RE: Well Drilling Site Picked on Possible Easment

Dear Sir:

It has been brought to our attention that the drilling site you have picked for drilling a new well may be on an easement right of way. Let me remind you that it is the owner's responsibility to research such information and take full responsibility for choosing the drill location for all legal purposes. I must inform you that easements are usually for the purposes of future roadways, telephone, or power line placements.

L.O. Lynch Well Drilling & Supply, Inc. in no way will be held liable for any damages or legal suits that may result from the placement of a well on any easements or right of ways.

RE: Original permit #16245 Dated 2-25-1990

Note: This issue was just recently brought to Weber Valley Heights attention. We were never given a copy of this permit by L.O. Lynch or we would have amended it back in 1990.

In February of 1990, when this permit was issued, the well company, L.O. Lynch who pulled the permit, didn't bring the well location address with him, he only had Weber Valley's mailing address. At that time Weber Valley did not have their own mailbox and the President used his address as the mailing address. *That's where the mix up occurred, 44135 Perryman Lane was the mailing address.*

Weber Valley Heights Association has amended the Well Drilling Permit and the Application for the well permit to reflect corrections. The originals are attached to the amended permits.

Also enclosed is the recorded "GRANT OF EASEMENT" that describes in detail where the well is located.

\*\*\*Riverside County Transportation Department *changed* the name of that portion of East Benton Rd. to Ginger Circle after the Grant of Easement was recorded, due to a neighbor sub-dividing his property.

We are submitting these copies for your records and have retained a copy for our records as well.

Thank You
