The Standard of Excellence for Over 100 Years

Client Name: Weber Valley Heights Association  
Contact: Debbi St Pierre  
Address: 44350 Benton Rd.  
Hemet, CA 92544

Report Date: 06-Feb-2019

Analytical Report: Page 1 of 4  
Project Name: Weber Valley DW-CCs  
Project Number: No Project

Work Order Number: B9A2764

Received on Ice (Y/N): Yes Temp: 6 °C

Attached is the analytical report for the sample(s) received for your project. Below is a list of the individual sample descriptions with the corresponding laboratory number(s). Also, enclosed is a copy of the Chain of Custody document (if received with your sample(s)). Please note any unused portion of this sample(s) may be responsibly discarded after 30 days from the above report date, unless you have requested otherwise.

Thank you for the opportunity to serve your analytical needs, if you have any questions or concerns regarding this report please contact our client service department.

\*\*\*\*\* Phone #: \*\*\*\*\*

California Drinking Water regulations require that the results for specific sources be reported to the State in electronic format. The notation "EDT" will appear on the header page of each report if this information has been sent to the State database. Also, enclosed is a copy of the Chain of Custody document (if received with your sample(s)), if you have any questions or concerns regarding this report please contact our client services department.

The following samples are included in this report:

Lab Number	Sample Name	Sampled	Sampled By	Received	Submitted By

COUNTY OF RIVERSIDE  
DEPARTMENT OF ENVIRONMENTAL HEALTH

Steve Van Stockum, Director

Mail To: Weber Valley Heights Association

c/o President Jeff Hall  
44350 Benton Road  
Hemet, CA 94544

4 June 2015

Dear Jeff,

Weber Valley Heights Association (WVHA) will be required to submit four (4) resample's (one (1) from Well No. 1 and three (3) others from the distribution system). The well will need to be chlorinated to 4ppm (two (2) gallon bottles of household strength bleach for 6 hours and flushed and then resampled. This because, recent quarterly sampling analyzed on, 27 April 2015 revealed Total Coliform "PRESENT" (TCP) from Well No 1 at the Franco residence.

WVHA well No. 1 water for domestic use is violating the current state and federal maximum contamination level (MCL) for TC.

The California Department of Health Services (Department) sets drinking water standards and has determined that the presence of total coliform is a possible health concern. Total coliform are common in the environment and are generally not harmful themselves. The presence of these bacteria in drinking water, however, generally is a result of a problem with the source well or the pipes which distribute the water, and indicates that the water may be contaminated with organisms that can cause disease. It is therefore recommended that bottled water be used for drinking purposes until the resample indicate an "ABSENT" for TC.

If you have any questions, please call me.

Sincerely,

Greg Dellenbach, REH  
County of Riverside  
Environmental Protection and Oversight Division  
951-955-8980
