Please specify records request: All permits and records related to, both, any previous and or present code violations for APN 571-040-002. Including dated notes as related to the parcel..
Any all permit records and maps for this APN 571-040-002, the location is @ 44100 Ginger Circle. Please include the new or old permit numbers for the newly connected 10-5-2019 energy source. Therefore the new connection is supplying electricity to a well on my parcel. Was a permit required prior to commencement of that new electrical supply work?

Please check APN 571-040-003 and APN 571-040-004 for the electrical that was connected today. The source of energy is ran underground and across three separately owned parcels. The power takeoff location starts at the Southeast corner of APN 571-040-004 then it heads 330 feet west, then across APN 571-040-003 330', then terminating another 165' west on APN 571-040-002. The well pump is another 588' below grade.

Thursday 10/3/2019 at 9:00 am the well on my parcel failed to be energized, the wiring remained disconnected for well over one month. . Around 5:30 pm today 10-5-2019, I was informed that new wiring was installed and connected today to the unpermitted well on my parcel . Is there any electrical permit for the well on our parcel? If not, what is the violation number for connecting a 240-v energy source crossing under the surface of three parcels?

Please check all that apply: Records for inspection;Records to be copied (check one only)

Method of Delivery I want to pick up the requested records
